# THE ROOT

Grow With Us

## Buds From The Board

BY KATHRYN WELLS, PRESIDENT

Happy December, Friends,

It seems that 2021 has been a bridge year, transitioning us from the challenges of 2020 into the promises of 2022. The new year glimmers with great hope, and we Denton County Master Gardeners look forward to continuing our mission of educating and engaging our community with more face-to-face and smile-to-smile activities in the days and months ahead.

You may notice that the December and January issues of *The Root* are briefer than usual; that's by strategic design, so that our editor and contributors may have some extra time to spend with friends and family during the holiday season. We hope you have plenty of joyful moments, too!

Denton County Master Gardeners and Denton County residents—each of you is a true treasure. May every good gift be yours this season ... and every season.

## 2022 Garden Tour Preview

BY KATHI FAST

### *Four Northern Denton County Gardens*

*May 7, 2022*

#### *Rockin' B's Creekside Wilderness*

Three beautiful acres with multiple beds featuring roses, native and adaptive perennials and wildflowers, as well as vegetable gardens. The garden focuses on native bees, with several native bee houses located on the property. A large water collection system located on the property is used only for watering the vegetables.

#### *Urban Butterfly Haven*

A virtually maintenance-free property filled with native and adapted plants. This garden requires no herbicides, pesticides, or supplemental watering. An 80 x 5 foot raised vegetable bed occupies much of the side yard and supplies the homeowners with a continuous supply of fresh produce. This "regular-sized" lot packs quite a punch and is sure to inspire gardeners working with spaces of all sizes: small, large, or just right.

## 2022 Garden Tour Preview (Cont.)

### *Big Sky Oasis*

Enjoy a leisurely drive through Horse Country USA on your way to Big Sky Oasis. Although retired from breeding American Morgan horses, the owners continue to cherish the solitude and tranquility of their ranch. While still enjoying their Morgans, they now have time to embrace their love of roses as well as having the satisfaction of planting and harvesting their favorite vegetables. Discover the simplicity of raised beds and container gardening. Bring your rose questions.

### *The Bar B Legacy Farm and Gardens*

This 22-acre property is the only "working" farm on the tour. It features a large barn with many farm animals, stock tank, hay fields, and includes landscaped and wooded areas. Look for themed flower beds, repurposed items, raised garden beds designed for ergonomic gardening for physically limited gardeners. The property also has guest cottage and she-shed.

## Janet's Corner

BY JANET LAMINACK, AGRILIFE EXTENSION HORTICULTURE AGENT, DENTON COUNTY

### *Am I right or Amaryllis? A lily bit on bulbs*

For a few years now I have given members of my family amaryllis bulbs as holiday gifts. Sometimes I buy a kit or order a unique variety online; sometimes I pick out a bulb at a garden center and dress it up myself with a container and glass beads. As gardeners, we know how fun it is to grow things and amaryllis bulbs are quick and fairly fool-proof. To take the stress off my recipients, I offer to take the bulbs back once they stop blooming or \*GASP\* encourage them to toss it after. Heartless, I know, but I really hate all the questions and fussing over the bulb that comes with them trying to rebloom it. Also, I love fresh flowers; part of their appeal and beauty to me is that they are mortal and finite. It makes it all the more luxurious and indulgent to enjoy the blooms for a short time.

Outdoor bulbs are fantastic as well. I don't always remember what I planted where ... I'm like a squirrel, so there are surprises! Not all good surprises, because apparently I have added mulch and cardboard over some of my bulbs – I'm hoping they will fight their way through all of that someday. I have a gazillion grape hyacinths (I'd be glad to share). They are reliable and multiply. I also have daffodils that are so cheery and bright and also reliable. My daffodils (or narcissus) haven't spread as quickly and look a little wimpy: swaths or groups of daffodils make a much better impact. Over the years, I have planted more rain lilies and they usually catch me off guard. And apparently I obtained some schoolhouse lilies (or oxblood lily) at some point. Their bright red blooms were unexpected flair to my fall garden.

In the last few years I have tried to add alliums to my bulb repertoire. It started by receiving three *Allium schubertii* bulbs. Apparently a common name for it is tumbleweed onion, which makes sense. But, it could also be called "starburst" or "volleyball" or even "Reunion Tower" onion. Once they bloom, the seed head dries and makes for an interesting and long-lasting conversation piece. The other alliums that I have added have not been as successful because they come out after my trees have leafed out. I've been moving them around to find their happy spot. That is, if I can remember where I planted them to begin with ....

## Master Gardener Help Desk

*If you have questions about any horticulture-related subjects,  
please contact our Master Gardener Help Desk at 940.349.2892  
or [master.gardener@dentoncounty.gov](mailto:master.gardener@dentoncounty.gov).  
It's free of charge, and our pleasure to assist you.*

.....

## Newsletter Change Notice

*The December and January issues of The Root will be announcements only.  
This will give the Newsletter Editor & Authors time to enjoy the holidays with their  
families. You can expect the February 2021 issue to be chock full of the gardening  
articles and information you have come to expect.*

*The Newsletter staff thanks you for your understanding.*

### TOP GARDENING TIPS

## December

Forage for fresh holiday decorations; leave seeds and berries for wildlife.  
Clean, sharpen, repair, and store garden and lawn tools.  
Leave the leaves! Mow in place, compost, or use as mulch.  
Check trees for damaged limbs that may be compromised by ice.  
Relocate established trees & shrubs during winter dormancy.
