VICTORIA GARDEN PHLOX

Phlox paniculata 'Victoria'

Texas Superstar Perennial

Pollinator Friendly

Full Sun **Water:** Medium, drought tolerant

3' Tall x 2' Wide **Color:** Magenta Pink

Blooms early summer to September

Grown by a Denton County Master Gardener

General Information

A hardy 3-foot-tall perennial with attractive magenta pink blossom clusters. Victoria Phlox's foliage is a lighter green than the more common phlox variety, 'John Fannick' and has a more open growth habit. This *Texas Superstar* performs well as a perennial border and its fragrant flowers attract butterflies and hummingbirds.

Characteristics

Hardiness Zones: 4-8

Heat Tolerance: High

Size: 3 feet tall by 2 feet wide

Flowers: Magenta pink

Bloom time: Early summer to September

Leaves: Light green, 3 inches long narrow pointed leaves

Pests and Disease Problems

Phlox bugs, powdery mildew and root rot can be serious problems. Spider mites can also be a problem

Plant Care

Victoria Phlox grows best in full sun. Water requirements are medium once established; water once or twice a week during the growing season. Phlox requires fertile, well-drained soil and for best results enrich the soil with organic matter. Fertilize at planting time and annually with a timed-release product. Propagate Phlox by division or use rooted stem cuttings. Remove faded flowers to prolong the bloom period. Cut back the dead foliage (to the ground) after it freezes in late fall or early winter.

Warning

None
